### Objectives

For non-Italian-speaking students, due to the impossibility to follow the course's material and lessons (in Italian), there is the possibility to prepare the exam on a specific English text. This study will provide international students with advanced knowledge for understanding the evolution of labour law in the context of digitalisation, both at the international and national level.

### Evaluation system and criteria

The exam consists of an **oral test**, expressed in thirtieths, aimed at ascertaining the student's **knowledge and ability to understand the topics** dealt with during the study of the English text, **to draw conclusions**, as well as **his/her communication skills**. The oral exam will be in English.

The examination will be aimed at assessing comprehension of the entire text, but the student may study in depth three articles of his or her choice.

### Bibliography and resources

The exam will be held on this text:
